TASK

When comminuting extremely hard and abrasive materials – such as porphyry, granite or basalt – the requirement is to produce a highly cubic final product rich in fines.

SOLUTION

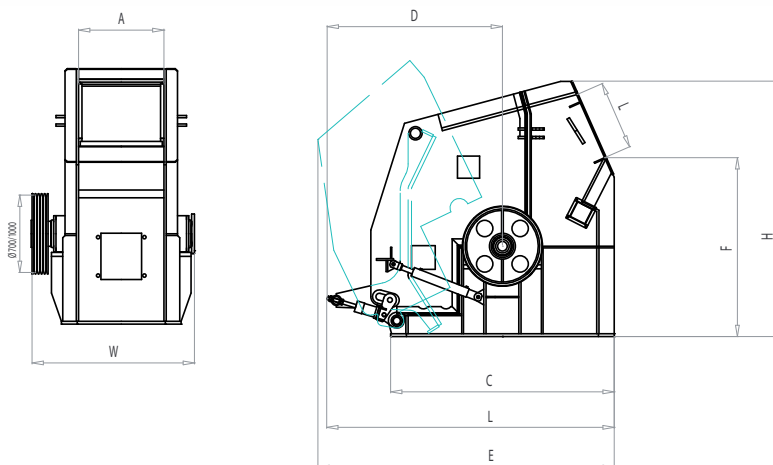

In order to meet this requirement, COMEC has designed its impact crusher of the SU type. A hydraulic system enables easy access to the crushing chamber. The internal wear plates are interchangeable.

BENEFIT

Due to its favourable design the COMEC impact crusher is suitable for both soft and hard rock. Its chamber is easily accessible, which makes the COMEC impact crusher particularly easy to service. A long service life due to interchangeable wear plates makes for a highly economical concept.
